

EMPOWER YOUR BUSINESS

RSPEED

Improve your bottom line.

proven technology

expert staff

In today's volatile business environment it's a challenge to gain and continually maintain a competitive edge. That's why RSPEED's strategic IT solutions, technical service offerings and reliable expert staff are the perfect complement to your growing enterprise.

RSPEED specializes in providing proven technology to advance the performance, availability, and security of business-critical networks and software applications.

With RSPEED's professional-grade services, your entire IT management process is streamlined and simplified.

Best of all, by outsourcing to RSPEED, your upfront cost for purchasing new equipment is minimized and sometimes even eliminated. This results in a valuable solution that improves your bottom line.

Deploy business-critical applications faster and easier with RSPEED, Inc.

RSPEED identifies network, server and software inefficiencies and creates effective, customized solutions for rapid deployment throughout your organization.

RSPEED's expert technical staff designs and installs:

- Comprehensive Internet Security solutions
- Remote Access solutions
- Integrated LAN & WAN management solutions
- Help Desk applications
- Remote Device Management and monitoring
- Advanced Diagnostics and performance solutions

RSPEED's knowledgeable technical sales and service team provides:

- Quality, customized products and service
- Exclusive RAMP™ technology and methodology
- 24/7 continuous service and technical support

Only RSPEED provides RAMP™ technology — designed to save you money.

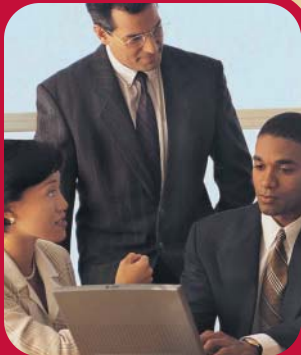

A true IT **solution** is one that meets today's needs and evolves with your business to meet tomorrow's demands.

RSPEED has developed a unique technology and implementation methodology called *Remote Administration & Monitoring Platform*, or **RAMP™**. This exclusive process and suite of solutions will optimize your IT infrastructure and keep it running smoothly as your company grows. Additionally, RSPEED monitors networks 24 hours a day, 7 days a week utilizing the latest products and services to evaluate and diagnose potential network weaknesses. Potential problems can be predicted before they affect mission-critical processes and data.

The result? RSPEED delivers the power and knowledge you need to act quickly for improved efficiency and overall peace of mind.

Choose RSPEED for Reliability, Scalability and Value.

24/7

Our Mission:

To provide scalable IT solutions that are highly reliable, secure, and cost effective, for companies worldwide.
